Turtable Ramps for Wheel Alignment

Set 4 pcs.

TECHNICAL DATA:

STEEL:	Hot-dip galvanized
DIMENSIONS:	780x355x50 mm
SET:	4 pcs.

Turtable ramps are essential equipment for suspension geometry measurement stations ♦ They enable smooth entry and exit of the vehicle from the turntable, ensuring safety and precision during measurements. ♦ Made of high-quality materials, the ramps are characterized by high strength, resistance to deformation, and durability under intensive workshop use ♦ Compatible with most turntables available on the market ♦ Anti-slip surface ensures wheel stability. ♦ Ergonomic profile facilitates vehicle entry and exit. ♦ Can be permanently mounted to the ground or used mobile. ♦ Made of durable materials: hot-dip galvanized steel ♦ Load capacity suitable for passenger cars and light commercial vehicles ♦ The ramps are designed to work with turntables at wheel alignment measurement and adjustment stations in automotive workshops, diagnostic stations, and service centers
